PROFESSIONAL SUMMARY

Results-driven Business Analyst with 10+ years of experience bridging business needs with technology solutions across banking and consulting environments. Skilled in business requirements gathering, process analysis, stakeholder management, data analysis, and Agile project delivery. Proficient in SQL, Power BI, Excel, JIRA, Azure DevOps, Confluence, Microsoft Visio, and Lucidchart to develop data-driven insights, optimize business processes, and improve operational performance. Experienced in facilitating UAT, managing product backlogs, creating business documentation, and delivering solutions that enhance efficiency, reduce project risks, and support strategic business objectives.

CORE SKILLS

BRD | PRD |Functional Requirements | User Stories | Acceptance Criteria | UAT | RACI Matrix | Data Analysis | Data visualization | Data preparation and cleaning | Dashboarding and reporting | Statistical modelling and regression analysis | Predictive analytics | Requirements elicitation | Stakeholder management | Process improvement | Project and change management | Business intelligence

TECHNICAL SKILLS

Excel | SQL | Tableau | Tableau Prep Builder | Power BI | Alteryx Designer | Python | MySQL | Google Analytics 4 (GA4) | Microsoft Word

PROFESSIONAL EXPERIENCE

Business Analyst | Amdari Inc

United Kingdom | Jun 2026 to Present

- Improved requirement traceability and reduced project rework by 30% by gathering, analyzing, and documenting business and functional requirements in BRD and PRD using Confluence.
- Streamlined issue resolution and reduced sprint delays by 20% through effective project tracking and backlog management in JIRA and Azure DevOps.
- Leveraged Excel, SQL, and Power BI to analyze operational datasets, generate performance dashboards, and provide insights that supported data-driven decision-making for 5+ project stakeholders.
- Built interactive Power BI dashboards to monitor project KPIs, sprint velocity, and operational metrics, improving leadership visibility into project performance and reducing reporting preparation time by 35%.
- Enhanced team accountability and collaboration across 5+ cross-functional teams by developing RACI Matrices in Excel and Confluence, clearly defining stakeholder roles and responsibilities, and fostering efficient communication.
- Boosted operational efficiency by 25% by designing and optimizing business process flows in Microsoft Visio and Lucidchart, identifying inefficiencies, and implementing process improvements.
- Reduced post-launch defects by 35% and improved system reliability by leading User Acceptance Testing (UAT) in JIRA, creating detailed test cases, and tracking defects throughout deployment.

Business Analyst Intern | TROT CIC

Old Gloucester Street, London, UK | Dec 2022 to Present

- Summarised datasets into narratives, charts and dashboards to communicate insights to stakeholders using Tableau and Power BI.
- Analysed existing systems and processes, identified improvement opportunities and recommended strategic changes to measurement and KPIs.
- Generated regular reports to track project performance and progress, supporting operational decision making.
- Partnered with cross-functional teams to guide quality and process improvements and operationalise key metrics.

Data Analyst / Business Analyst | First City Monument Bank

Ikoyi, Lagos, Nigeria | May 2018 to Aug 2022

- Performed data discovery, analysis and modelling to identify business opportunities for scalability and expansion.
- Gathered and documented stakeholder requirements to produce clear, unambiguous specifications for solutions and processes.
- Prepared source data for database entry and management, ensuring data accuracy and 0% error in inputs.
- Developed and implemented improved workflows and strategic approaches to reduce costs and support sales growth across operations.
- Collaborated across departments to ensure data integrity and advised on risk and matter management plans.

Customer Experience Analyst | First City Monument Bank

Ikeja, Lagos, Nigeria | Feb 2014 to Apr 2018

- Used data analysis techniques, including statistical modelling and regression analysis, to identify trends in organisational performance.
- Developed and executed marketing and business programs that increased customer traffic by 29%.
- Analysed operations and recommended changes that increased operational efficiency by 19%.
- Coordinated branch activities to promote low-cost growth and enhanced customer experience by 30% through onboarding, alternate channel promotion and cross-selling.
